PROFESSIONAL SUMMARY

Full-Stack Web Engineer with a strong foundation in frontend/backend development, cloud infrastructure, and database systems. I specialize in building scalable and secure web applications with a focus on performance, maintainability, and modern development practices

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript

Backend: PHP, PYTHON

Databases: MySQL, MongoDB

DevOps : Git, GitHub, GitLab Runners CI/CD pipelines, Docker

APIs: RESTful APIs design & integration

PROJECTS

DevSec labs 🐙 | HTML, CSS, JS, PHP, Mysql, Docker

- Built Docker-based Ubuntu missions with isolated VS Code and SSH access for development.
- Offers real-world labs to sharpen ethical hacking and defence skills
- Integrated Development tools and services (SQL, MongoDB, Adminer) for development

Honeypot SSH 🐙 | Python | bash

- Developed a stealth SSH honeypot that mimics real server behavior to deceive attackers
- Logs brute-force attempts, shell commands, and attacker IPs in real time
- Simulates a real SSH service to engage attackers

INTERNSHIP EXPERIENCE

Cybersecurity Intern – cyfotok infosec, Coimbatore (May–June 2025)

Tasks: Threat detection, scripting, API monitoring, secure workflows, custom tool development, hacking workflow automation.

EDUCATION

sri krishna college of arts and science

Bachelor of Computer Applications (BCA)

Current CGPA: 6.9

ACHIEVEMENT

- HACKATHON - Gamejamhackathon 3rd place
- LeetCode – Earned 100 Days Badge for consistent problem-solving
- ICT academy - learnathon 2024
- Google Cloud AI Skill Badges (5x)

CERTIFICATION

SPOKEN TUTORIAL - C, C++, JAVA, RDBMS

COURSERA-CORE JAVA Specialization

COURSERA-IBM Generative AI for Cybersecurity

NASSCOM-CLOUD MASTERCLASS - CLOUD PRACTITIONER ESSENTIALS
